

Manchester Skull Base Course Feedback 2018

General

1=poor; 5=excellent

Lectures

I haven't broken the scores down by lecture because of the number of them but all lectures achieved 4 or 5 with the vast majority graded as 5.

83% of delegates said the number of lectures was just right. 17% wanted more lectures.

Course Organisation

All areas have been steady or improved compared to last year with the exception of the score for practical supervision, value for money and equipment quality. The differences are unlikely to be significant but with regards to supervision, 3 delegates did say that they would have liked more supervision in the lab. One delegate said that this was particularly true of day 4 (endoscopic day). The value for money score may have dropped a little because the course fee went from £990 to £1300 this time. The scores for pre-course communication and website have jumped significantly despite the website being exactly the same. I did do more of the pre-course communications myself this time. The course manual scores are better and this may reflect the revision of some sections, some new drawings from our illustrator and the introduction of some photos from last year's course.

How Useful Were The Following Teaching Methods

Not surprisingly the scores were high for each of these and were similar to last year. The improvement in the lectures score probably reflects the introduction of all the pre-dissection presentations.

Overall

Other Lectures To Include

Total petrosectomy

Any Teaching Methods To Enhance The Course

Clinical cases

Anything We Should Do Differently

Send out the manual earlier

More one to one tuition

Strengths

Excellent 360 degree approach x 4

MDT approach

Excellent faculty x 5

Excellent specimens x 2

One specimen per delegate

Excellent demonstrations

Lectures x 2

Appropriate pace

Good to see both ENT and neuro perspectives

Weaknesses

Specimens a bit stiff

Transfacial approaches missing from handbook

More faculty supervision x 3

Better suction (kept blocking up) x 2

Several said no weaknesses

How Did You Find The Course

60% word of mouth

30% website

10% AOT

Further Comments

Thanks very much! Effort of organising and running course much appreciated

Overall fantastic. Thank you all

The course is just perfect. I loved it. Happy to come again.

I think this course is complete and covers a wide field of ENT and neurosurgery

I would like to attend the course next year. Highly recommended. Thank you.

Good balance between dissection and practical.

Overall one of the best courses I've been to. Thank you
